

## The Value of Technology TechPower Solutions Demo Series

You are invited to join **TechPower** and **VMware** for a live in-depth demonstration of VMware's View3 (Formally Virtual Desktop Infrastructure).

VMware View3 with ESX 3.5 gives you greater flexibility, reliability, efficiency and security managing desktops and applications from the datacenter. See how the overall cost of desktop computing can be reduced by up to 45%.

### View 3:

- Lower costs by centralizing management, administration and resources
- Increase security by moving data from desktop devices into the datacenter
- Improve business agility with faster provisioning and user flexibility with universal access
- Deliver, manage and update all of your Windows desktops and applications from a central location
- Use a single management tool to provision new desktops or groups of desktops
- Print from virtual desktops to local devices without compatibility issues, bandwidth restraints or complicated user setup
- Run managed virtual desktops locally or in the datacenter through the same administration framework with Offline Desktop, an experimental feature in VMware View 3
- Separate applications from underlying operating systems for increased compatibility and streamlined application management with VMware ThinApp
- Deliver high availability with no single point of failure

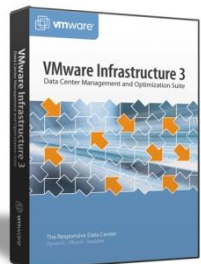

### AND SEE WHAT'S NEW WITH VSPHERE!

See why **all 100** of the Fortune 100 companies use VMware to go beyond the boundaries of traditional IT infrastructure.

**When:** Wednesday, June 24th
