## IT SOLUTIONS

### VIRTUALIZATION PROOF OF CONCEPT

#### Proof of Concept Package Includes:

- HP C3000 Tower Chassis  
31" W x 21"H x 10.5"D
- Two Blade Servers configured for VMware ESX3.5 Server
- One HP Blade Server configured for Virtual Center Server
- Shared Storage tied to VMware ESX 3.5
- **Capable of demonstrating VMware Solutions including; Virtual Desktop Infrastructure and Virtual Infrastructure**
- Two days of engineering services to set up the configuration and train personnel on the environment

#### **What is a Proof of Concept?**

A proof of concept is a way to explore a technical solution to determine; if the solution is going to work, to reduce procurement risk by testing with the target hardware prior to purchasing, to get your staff exposed to the solution, and to get the full buy-in from the team to ensure it is the right solution. TechPower's bundle is a combination of hardware, software, and services to enable you to explore new technology and software solutions. This particular package is targeted to demonstrate VMware's Virtual Infrastructure running on HP Proliant C-Class blades, but can be configured to meet other requirements.

#### **What are the benefits of a Proof of Concept?**

- Helps you validate the solution before you purchase
- Reduces the learning curve by having a VMware Certified Engineer assist with setup and targeted learning, to get the POC environment up and running.
- Gives you a hands on learning approach to the HP C-Class Blade infrastructure, a feature that reading spec sheets and watching demos simply cannot match.
- Instantly provides a VMware Virtual Infrastructure that will answer your questions about virtualization and how it will fit into your environment.
- Set-up's convenient size: 31"W x 21"H x 10.5"D
