

# TechPower and VMware vSphere Health Check– Full Version

## Overview

You've made a significant investment to virtualize your computing environment— let an expert help you get the most from your investment. Virtualization touches many aspects of your data center such as servers, networks and storage, and the organizations and processes that control them.

A VMware Certified Professional consultant will work with your team to understand your unique environment and provide guidance on the current best practices for configuring and managing VMware Infrastructure. Working together with your team, our consultant will review your VMware environment and provide concrete, actionable recommendations to optimize your virtual infrastructure.

## Deliverables

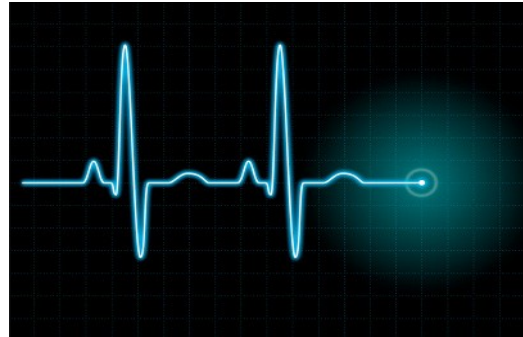

- Conduct assessment of your VMware Infrastructure using the VMware HealthAnalyzer virtual appliance to collect inventory, configuration and usage data
- Identify potential opportunities to optimize configuration and improve performance
- Hold an interactive workshop to facilitate knowledge transfer on VMware best practices

## Key Benefits

- Optimize VMware performance
- Maximize resources through efficiencies and roadmap for future improvements
- Mitigate risk by leveraging experienced consultants and proven best practices

## Requirements

- Existing VMware Infrastructure including VMware ESX
- Administrator (root) access to VMware installations
- Conference room with networked desktops/ laptops running MS Windows 2000 or higher

## Pricing and Scope

- Up to (2) days on-site, and (1) day off-site to create assessment report
- Health Check includes up to 10 ESX Hosts
- Maximum of (5) participants for interactive workshop
- VMware Health Check will be delivered by a VMware Certified Professional (VCP) consultant from TechPower Solutions
- **PROMOTIONAL PRICING- \$5,000.00**  
If you book a Health Check before December 31st (45% off Regular Price)
