**TechPower IT Solutions Network Infrastructure, Enterprise Storage, Security, Professional Services**

A successful network begins with the proper total network design. Our system engineers and account consultants evaluate your needs and present an objective network design that meets your specific requirements.

**TechPower IT Solutions** offers professional consulting, design and implementation services for a wide range of products and solutions. Our experienced engineering staff is also available to help you with your networking needs, ranging from a straight-forward hardware component installation to the complete design of your network.

## Storage and Backup\*

We are an **HP Authorized Enterprise Storage provider** and integrator. Our team provides SAN, NAS, DAS and Backup certified solutions. Design, implementation, project management, and support are available through HP and TechPower services.

## Server Virtualization

**VMWare\*** allows us to partition and consolidate systems in the most demanding environments with its cost-effective, highly scalable virtual machine platform and advanced resource management capabilities.

## SSL VPN

Utilizing **F5's Firepass\*** world class SSL VPN technology we can provide your organization with secure, clientless, remote access from any device, to any application, from anywhere in the world.

## Voice Over IP PBX Solutions

**ShoreTel Communications\*** offers reliable, scalable, fully featured PBX systems to enhance your organization's communication while saving you time and money.

## Information Security \*

**Juniper** and **Cisco** Firewall appliances allow your organization to have fast, secure communications to the Internet. Let one of our certified engineers assess your security needs.

## Broadband Connectivity

Our skilled engineers are experts at designing best of breed solutions using industry leading manufacturer's such as **Cisco, F5\*, HP ProCurve\*** and **Juniper\*** to get the most out of your network and broadband connections.

## Data Center Deployment

Do you have a growing data center and need help assessing your power, cooling, rack management requirements? Let our engineers talk to you about **APC\* InfraStruXure™**.

## Wireless Access Solutions

**Cisco\*** and **HP\*** offer Best-of-breed wireless and secure wireless connectivity. Ask us to do a wireless site survey for your organization.

## Single Sign On

Throw out all those post it notes! With **Imprivata\*** you will no longer have to remember multiple passwords to access your applications. Enhance security by implementing security tokens or biometric (fingerprint) identification.

## IT Outsourcing

IT issues like desktop support, server maintenance, laptop repair or printing problems making you blue? Need to put together a proof of concept in order to achieve budget approval? Call TechPower IT Solutions. We are classified as both an HP & IBM service center. This combined with our expertise on all the lines we carry gives us the ability to alleviate many of your network management and maintenance woes. Let TechPower IT Solutions assist you in achieving a smooth running computing environment for your organization.
